

--IN THE SPECIFICATION--

Page 18, line 5, amend the paragraph beginning with "Figure 2 depicts the strategy ..."
as follows:

- - Figure 2 depicts the strategy for design and creation of a fluorescent protein-fragment
complementation assay, exemplifying the full length nucleotide sequence of wild type *A. victoria*
GFP (SEQ ID NO:1) (shown in the upper box) and two possible nucleotide fragments F1 and F2
thereof (lower box) obtained by fragmentation after residue 158 of the corresponding amino
acid.--
